(Abstract available)

DESCRIPTORS: \*Thermoplastics, Material forming,  
\*Molding, Injection.

A series of studies and practical suggestions on  
injection molding of thermoplastic materials is  
presented. The different factors governing molding  
and determining in each case the best conditions for  
utilizing the equipment are examined in detail. In  
order to locate the problem accurately, the mechanism  
of injection is briefly summarized. (Author)
